

About the Program

Public health is a diverse field that attracts professionals from various educational backgrounds who work to reduce complex health issues such as sexually transmitted infections, chronic diseases, environmental hazards, and substance abuse; and serve communities locally and globally to improve peoples’ health and prolong lives. Public health professionals need to collaborate with clinicians, health care agencies, and community members to identify resources to help mitigate these health issues and prevent future health problems.

The MPH program is designed for students who are interested in pursuing a career in public health and for those who want to enhance their careers. Most of the professional positions in public health require a graduate degree, as this allows individuals to carry out the core functions of public health. Upon graduation, students will be prepared to pursue careers in government agencies, academia, health care institutions, public health interest groups, and non-profit organizations.

Academic Calendar & Application Deadlines

Semester	Complete Admissions by:
Fall (September–December)	August 31
Winter (January–April)	December 31

International applicants are encouraged to apply three months before the start date.

Contact Information

U.S. Citizens/Permanent Residents

All admissions related correspondence should be sent to the campus of your choice.

Bronx Campus
King Graduate School
Monroe College
2375 Jerome Avenue
Bronx, NY 10468

MASTER OF PUBLIC HEALTH

The Master's of Public Health is a 45 credit program. Students are required to choose one of the following concentrations: Biostatistics and Epidemiology, Health Administration and Leadership, or Community Health. These concentrations are driven by a curriculum that provides extensive knowledge and skills needed to conduct essential public health services. The first semesters will involve traditional public health coursework, while the last semesters will be devoted to a practice-based internship and a thesis paper or integrative seminar focused on an outcome oriented project.

FOUNDATION CORE COURSES (1 credit)

KG 583 — Foundations of Statistics (may be required)

CORE COURSES—The MPH Program is a 45 credit program consisting of professional core courses, a research course, an internship, and student's choice of concentration area.
